Anthropic's open-source plugin collection, built for Claude Cowork and also usable with Claude Code. Each plugin bundles skills, connectors (MCP), slash commands and sub-agents for one job function: sales, customer support, finance, legal, marketing, data...

How it works in six steps

1. **Pick a plugin by role** — sales, finance, legal...
2. **Manifest** — .claude-plugin/plugin.json
3. **Connect your tools** — .mcp.json: Slack, CRM, docs
4. **Skills** — domain knowledge, auto-triggered
5. **Slash commands** — commands/, call them directly
6. **Tune it to your company** — edit markdown and JSON

Quick start

```
# Add the marketplace (Claude Code)
claude plugin marketplace add anthropics/knowledge-work-plugins

# Install a plugin
claude plugin install sales@knowledge-work-plugins

# Call a slash command
/sales:call-summary # another README example: /data:write-query

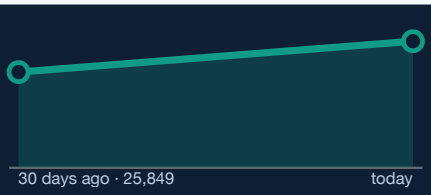

# Use Cowork
Install from claude.com/plugins

# Needs: Claude Cowork or Claude Code; each connector needs an account with that service
```

Key commands / features

- **`plugin sales`** — call prep, pipeline, outreach drafts
- **`plugin customer-support`** — triage tickets, draft replies
- **`plugin product-management`** — specs, roadmaps, user research
- **`plugin marketing`** — content, campaigns, brand voice
- **`plugin legal`** — contract review, NDAs, compliance

Growth

Two real points: the start of the window and today, axis from zero. The gain is as reported by GitHub Trending; we did not rebuild the star history.

Why this repo exists

- Claude does not know your company's own process, tools and terminology, so you re-explain them every time.
- Plugins package role knowledge you can customize: swap connectors, add company context, adjust workflows.

What to use it for

- Prepare calls and track the pipeline (sales)
- Triage tickets and draft replies (support)
- Reconcile accounts, prepare journal entries (finance)
- Build your own plugin for a role that has none

Think twice before you use it

- Plugins are "generic starting points" (README): tune them for your company.
- Skills can update a CRM, draft or send email, post to chat and book meetings within a connector's permissions (sales plugin README): start with read access.
- Connectors point at third-party services (Slack, HubSpot, Salesforce...): your data flows through them.
- The README presents 11 plugins while marketplace.json lists many more entries (including partner plugins): check the source of each one.
