KIEU STUDIO · GITHUB RADAR · EPISODE 34 · CHEAT SHEET

ruff

One Rust tool replaces Flake8, Black and isort for Python code.

Ruff (MIT, Astral) is a Python linter and formatter written in Rust: over 900 rules, automatic fixes, a cache, configuration in pyproject.toml, and VS Code, pre-commit and GitHub Action integration. The authors say it is 10-100x faster than existing tools.

How it works in six steps

1. **Read the config** — pyproject.toml, ruff.toml
2. **ruff check** — over 900 built-in rules
3. **Fix automatically** — remove unused imports, etc.
4. **ruff format** — Black-equivalent style
5. **A cache** — skips unchanged files
6. **Plug into your workflow** — editor, pre-commit, CI

Quick start

```
# Install (recommended)
uv tool install ruff@latest

# Lint the folder
ruff check

# Fix automatically
ruff check --fix

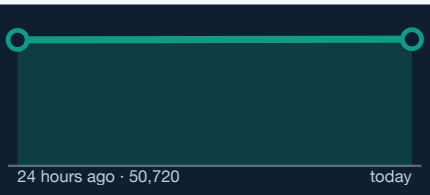

# Format code
ruff format

# Needs: Python and an installer (uv, pip or pipx); optional configuration in pyproject.toml or ruff.toml
```

Key commands / features

- `ruff check` — lint every file in the folder
- `ruff check path/to/code/` — lint one folder
- `ruff check --fix` — fix what can be fixed
- `ruff format` — format code
- `uvx ruff check` — run it without installing

Growth

Two real points: the start of the window and today, axis from zero. The gain is as reported by GitHub Trending; we did not rebuild the star history.

Why this repo exists

- Python has separate tools for each job (Flake8 and plugins, Black, isort), each with its own configuration and slow on big projects.
- Ruff gathers them into one Rust tool, equivalent to Flake8, isort and Black.

What to use it for

- Replace Flake8, isort, pyupgrade... with one tool
- Format code in the Black style
- Run in CI with the ruff-action GitHub Action
- Plug into VS Code

Think twice before you use it

- The 10-100x speed claim is the authors': measure it on your own project.
- --fix changes your code: read the diff before you commit.
- Install scripts using curl | sh or irm | iex run code from the internet: read them first.
- Python code only; Trending lists only today's gain for this repo.
